## The Ultimate Boot CD (UBCD) - Master, Hiren's boot CD!

# Download

6.0 Build 343 48K boot7em.360 E-DOSE 3.0-08 01/24/15 E-DOSE 3.0-08 01/21/16 A: It turned out that these files are just text files, no executable. So I deleted them. Anyway, thank you for all the help anyway! Q: Php create a mysqli query result as an array I'm currently creating a mysqli query result as follows: \$id = \$\_GET['id']; \$sql = "SELECT \* FROM menus WHERE id = ".\$id." LIMIT 1;"; \$result = mysqli\_query(\$connect, \$sql); \$row = mysqli\_fetch\_array(\$result); \$menu = \$row['menu']; echo \$menu; However, this result being passed into JS via JSON as follows: data: JSON.stringify(menu) with menu being an array containing the following: [{"id":2,"title":"about","page":"this is a page"}, {"id":3,"title":"contact","page":"this is a page"}] This means that when I parse the result in JS, I get a JS error. Uncaught SyntaxError: Unexpected token + I have heard that the error is caused by the JSON.stringify() function. How can I pass the result to JS as a JSON object containing the array as follows: [{"id":2,"title":"about","page":"this is a page"}, {"id":3,"title":"contact","page":"this is a page"}] A: Try this \$menu = array(); while(\$row = mysqli\_fetch\_array(\$result)){ \$menu[] = \$row['menu']; } echo json\_encode(\$menu); (i.e. you need the array() part in mysqli\_fetch\_array to transform the result into an array instead of a stdClass object) Also, you might want to omit \$menu = \$row['menu'] if the rest of your script doesn't depend on that. Otherwise, save the whole query in a variable and then fetch it with mysqli\_fetch\_assoc or mysqli\_fetch

Each kernel has its own resolution. You can choose between SVGA, X, 2X, 3X, 4X, for example. If there is no selection, the default value is chosen. Best recommendations For 4K you should see if you have an 8 core 8 thread CPU that is either Intel or AMD. If you have an option for a 64 bit architecture then be sure to use that instead as the 64 bit OS's do not necessarily use all of the cores in all of the 64 bit OS's as well as all of the threads in all OS's. If you have an option for the CPU optimization in the BIOS and you have an option for L3 cache as well, be sure to use the best optimization. 4K 8 GB RAM Intel Core i7 - 7700K AIDA64 No, GTX 1080 Ti Intel X99 chipset 4 cores and 8 threads 16GB Ubuntu 18.04 64 bit \$45 UEFI Bios Off Off GP100 \$45 No, \$20 AMD R9 Fury X Intel X99 chipset 4 cores and 8 threads 16GB Ubuntu 18.04 64 bit \$40 UEFI Bios Off On GP104 \$35 No, \$20 AMD R9 Nano Intel X99 chipset 4 cores and 8 threads 4GB Ubuntu 18.04 64 bit \$25 UEFI Bios Off On GP106 \$25 No, \$20 \$65 \$65 \$75 \$75 \$85 \$85 \$95 \$95 \$115 \$115 \$115 \$135 \$135 \$135 \$165 \$165 \$165 \$215 \$215 \$215 \$275 \$275 \$275 \$335 \$335 \$335 \$385 \$385 \$385 \$495 \$495 \$495 \$ 570a42141b
