In a medieval fantasy setting where magic reigns, the authority of the Church is fading, and an age of enlightenment is dawning. The Lands Between, a wilderness that intervenes between the Holy Kingdom and the World of Greyhawk, is on the verge of collapse. A valiant knight, Kane, dies fighting the criminal Black Dragon King, d'esteria. He is summoned to the Land Between by the aloof and enigmatic ruler, Gaharn. Strange creatures appear along with Kane's death, and they appear to be following him, but why? A young magician was found to be in possession of the artefact that was found in Kane's corpse: the cursed silver ring of the noble class of Elden that were used to enslave the Elves in ages past. Someone intends to drive them from the Lands Between once and for all. Kane is alive, but he is a different man. After meeting the benevolent ruler, Gaharn, at the nearby city of Luskan, Kane is spirited away and made to live in the Lands Between as Gaharn's guest. Gaharn offers Kane an opportunity he could not imagine: Kane is to become his kennel lord! In the Lands Between, Kane will venture through a vast world with many dangers, receive training in combat and magic from the local nobles, and race against rivals such as the noble d'esteria to become a new master. As your skills and strength increase, you must master the special technique and magic unique to the Lands Between. The power of the silver ring of the Elden is yours to wield—free your heart from your past and become the shining light of a new era... Characters are 4 players from the Dungeons & Dragons online characters. Characters can be created and levelled up through two different systems: a character sheet for when you are in a party with others and a special interface for playing the game offline. The interface system allows you to connect with and interact with other players and also plays the game for you. You can change your character's stats, level up, gain levels and rest at any time in the interface system. When you are playing an online game with others, the character sheet system is used to display character information. You can progress through a character's levels as you gather information on them, including their inventory, skills, and permanent bonuses. You can also change stat levels and upgrade them. For instance, when you increase a character's constitution, they can take more hits during
